

FORM 4 (Rule 5)

Section 7 of Care of Cathedrals Measure 1990 (as amended) Public Notice on application to the Fabric Advisory Committee

PUBLIC NOTICE

TAKE NOTICE that the Chapter of the Cathedral Church of:

*Insert name of
cathedral.*

St Peter in Exeter
.....

Insert date.

Has on this date: 24.09.2020

applied to the Fabric Advisory Committee of the said cathedral for approval of the following proposal:

*Short description e.g.
repair of vestry, loan of
chalice.*

The Proposal

To improve the presentation of the gates and porch it is now proposed to replace the existing polycarbonate sheet with toughened glass. This will avoid the risk of further discoloration if polycarbonate sheet is used again and, by using more considered fixing methods, the glass will provide a long term and more attractive solution.

Summary of the nature of work and its extent (and materials) [or in the case of an object, a short description of it and details of the proposal]

Currently the polycarbonate sheet is screwed through the edge of the sheet into the gate frames and bent over any projections beyond the face of the frame. For the new glass to the gates and spandrel panel it is proposed to use an aluminium channel to hold the glass. The channel will be spaced off and fixed to the frame of the gate and spandrel panel. The aluminium will have a black powder coat finish. The glass to the gates will be profiled around the latch boxes.

For the arched metalwork panel at the head of the opening, the glass will be supported along the bottom edge using an aluminium glazing channel. Along the curved edges, the glass will be located in place using steel cleats fixed into the mortar joints of the stonework.
