

FORM 5 (Rule 5)

Section 8 of Care of Cathedrals Measure 2011 Notice of Decision of Fabric Advisory Committee

TAKE NOTICE that the Chapter of the Cathedral Church of:

St Peter in Exeter

applied on

28th October 2022

for approval of the following proposal:

FAC approval is sought for lighting for the ground floor areas of the Pearson building to provide for its primary intended use as a (daytime) retail space as well as occasional use for (daytime and evening) events and private functions.

Summary of the nature of work and its extent (and materials) [or in the case of an object, a short description of it and details of the proposal]

The design revolves around a simple 100mm dia glass tube containing two conventional shaped LED bulbs which provide the general ambient light in the space. A metal band surrounds the central part of the glass tube to mask the lamp holders within. The band is finished to match the bronze-work of the shop display fittings and includes the same decorative brass finish quatrefoil design as other bespoke fittings in the wider cathedral scheme.

Representations

Representations in writing in respect of the above proposal were received from:

Historic England – No comments
Society for the Protection of Ancient Buildings – No comments
The Victorian Society – No comments

Decision

At a meeting of the Fabric Advisory Committee held on:

15th November 2022

the above proposal and representations were considered and the Committee decided to:

2. Approve the proposal subject to the following condition:

1. The committee will see and comment on one sample of the finished luminaire with frosted glass on all sides before all lights are procured.

for the following reasons:

The above condition was raised so as to determine how visible the shape of the bulb will be through the frosted glass.

Signed: Heather Hagen
Secretary of the Fabric Advisory Committee

Dated: 28.11.22
